

Boarded Cladding: Certainty from Design

CPD

Overview

Ensuring that you have confidence in Design is critical when it comes to boarded cladding. Using components and design advice from one manufacturer with the relevant testing to support is critical.

This presentation outlines what boarding cladding is, where it is used and the challenges you can face when designing it.

This CPD will cover:

- Ensuring long-life design
- Designing out risk
- Minimising maintenance
- Testing and Certification
- Design Opportunities

What we offer

- Morning, lunch or Evening CPD's to suit your practice.
- One of our experienced Project Specification Managers will deliver a CPD in our architecturally focused design facility in Clerkenwell or at your office.
- Duration - 45 minutes
- Refreshments will be provided.
