

Dry Screed Flooring Solutions

CPD

Overview

This CPD will provide a better understanding of how our Dry Screed flooring solutions should be specified on various types of buildings. It will look at how it can improve acoustic, fire, and thermal performances on a building.

Time will also be taken to look at what materials can be installed on them. For example, tiles, natural stone, timber floor, carpet, and vinyl.

This CPD will cover:

- Speed of construction over wet screed solutions
- Reduced floor build up
- Acoustic performance
- Fire performance
- GIFA vs Brio
- Thermal performance and underfloor heating
- Working load and point loading
- Case studies

What we offer

- Morning, lunch or Evening CPD's to suit your practice.
- One of our experienced Project Specification Managers will deliver a CPD in our architecturally focused design facility in Clerkenwell or at your office.
- Duration - 45 minutes
- Refreshments will be provided.
