

Dry lining Solutions in the Healthcare Environment

CPD

Overview

Drylining in healthcare can have a profound effect on the wellbeing of patients and staff alike. It is imperative that the construction design and specification is appropriate and meets performance requirements, especially given the pressures which this industry has been operating under in recent times.

This presentation outlines the core building regulations, and Knauf optimised solutions the healthcare environment.

This CPD will cover:

- Core documents
- Optimised solutions
- X-ray plasterboard
- Plasterboard and sustainability
- FAQs
- Case studies
