

Waste Management and Recycling

CPD

Overview

Knauf is committed to driving a sustainable and effective approach to waste management in construction. As construction methods continuously evolve, the consideration for the wider environment also increases and requires a best-practice approach from manufacturers.

This presentation outlines the current issue, and measures to reduce waste in the construction process.

This CPD will cover:

- The waste issue
- Measures to reduce waste
- Recycling plasterboard

What we offer

- Morning, lunch or Evening CPD's to suit your practice.
- One of our experienced Project Specification Managers will deliver a CPD in our architecturally focused design facility in Clerkenwell or at your office.
- Duration - 45 minutes
- Refreshments will be provided.
