

Drylining Solutions in the Education Environment

CPD

Overview

This CPD will benefit architects looking to have a better understanding of Education projects and how Knauf range of products can assist with achieving Building regulations, providing a robust education environment, acoustic separation within teaching spaces, acoustic reverberation control, and meeting fire requirements.

Education projects throw up a lot of challenges that you don't often encounter in other projects; the CPD will look at specialist products that will help you overcome these unique challenges.

This CPD will cover:

- Acoustic separation
- Acoustic reverberation control
- Relevant building regulation BB93
- Improving impact resistance
- Fixing to partitions
- Humid and wet areas
- Approved document M requirements
- Dry screed flooring
- Case studies

What we offer

- Morning, lunch or Evening CPDs to suit your practice.
- One of our experienced Project Specification Managers will deliver a CPD virtually.
- Duration - 45 minutes
