

Improving Design and Building Efficiencies

RIBA Approved CPD

Overview

Knauf invites you to join us on this RIBA-accredited seminar exploring various aspects of the construction design process. This learning session will provide an insight into the key areas of consideration when approaching sustainability assessment methods, performance requirements, safety & comfort for occupants followed by a look at some of the challenges our industry faces going forward.

This CPD will cover:

- Regulations – Building Standards BREEAM, Approved Documents.
- Fire – What is BS8414 & EN1364 and why are they important?
- Acoustics - What are the key regulations, documents and terms required?
- Thermal - to understand the terminology, monetary value and principles of heat loss in buildings.
- Sustainable / Green / VOCs - environment, recycling, efficiencies

What we offer

- Morning, lunch or Evening CPDs to suit your practice.
- One of our experienced Project Specification Managers will deliver a CPD virtually.
- Duration - 45 minutes
